About ME

I'm a **B.Tech graduate** with a strong foundation in Software Development with **2+ years of experience**, specializing in frontend and backend development. Experienced in building responsive web applications and full-stack projects, with a strong interest in learning new technologies and solving real-world problems.

Skills

- React JS
- C++ Programming Language
- Javascript
- SQL
- Node JS
- HTML
- Authentication + JWT
- MongoDB
- Express JS
- CSS
- Tailwind CSS
- Redux-Toolkit

Education

- B.TECH - Mechanical Engineering**, *Jamia Millia Islamia*  11/2020 – 06/2024
Graduated First Division with Honors, CPI **9.32**. New Delhi, India
- Class - 12th**, *Dehradun Public School*  04/2019 – 03/2020
Higher Secondary (PCM) with **84%**. Ghaziabad, India

Experience

- Wincode India** , *Software Engineer* Mar, 2024 – Feb, 2026
New Delhi, India
- Developed the frontend of a **Warehouse Management System (WMS)** using **React.js, Tailwind CSS, Framer Motion, and modern JavaScript libraries**, creating responsive and interactive interfaces & backend using **Django**.
 - Designed and implemented **8+ different barcode label formats** to support various product structures and client-specific requirements.
 - Developed functionality for **generating and converting barcode labels and product documents into PDF format**, improving the efficiency of warehouse operations.
 - Migrated the application's backend database from **MySQL to PostgreSQL** to support additional features and improve database capabilities.
 - Developed a complete **Full-Stack Restaurant website** using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
 - Implemented secure **JWT-based authentication and cookie-based session management** for the restaurant website.
 - Developed an **admin dashboard** that allowed the restaurant owner to manage orders, track revenue, monitor expenses, and calculate profits.
 - Integrated frontend and backend systems through **REST APIs** and implemented CRUD operations for products, orders, and other business data.
 - Optimized application performance, resolved bugs, and continuously improved UI/UX based on project and client requirements.

Projects

InterviewPilot.AI [*🔗*](#), (React JS, Tailwind CSS, Gemini-AI, Node JS, Express JS, MongoDB, JWT, Google Authentication, Framer-motion, javascript-libraries & Redux-Toolkit.)

- Developed an **AI-powered interview platform** that simulates real-world **HR and technical interviews** using AI-generated questions and responses.
- Built the frontend using **React.js, Tailwind CSS, and Framer Motion**, creating an interactive and responsive interview experience.
- Integrated **AI APIs** to generate personalized interview questions, evaluate candidate responses, and provide feedback.
- Implemented **HR Interview and Technical Interview modes**, allowing users to practice interviews based on different interview types.
- Developed a **resume upload and processing feature** using **Multer**, allowing candidates to upload their resumes for personalized interview preparation.
- Implemented a **confidence detection feature** to analyze the candidate's interview performance and provide confidence-related feedback.
- Developed a **credit-based usage system** to manage AI interview sessions and control API usage.
- Built the backend using **Node.js and Express.js**, creating REST APIs for authentication, interviews, user data, and AI-related functionality.
- Implemented **JWT authentication and secure cookie-based session management** to protect user accounts and application data.
- Integrated frontend and backend services using **REST APIs** and handled asynchronous AI responses and error cases.

Expense Tracker [*🔗*](#), (React JS, Tailwind CSS, Context API and Local Storage System.)

- Developed a responsive **expense tracking web application** to help users record, manage, and monitor their daily income and expenses.
- Implemented features to **add, edit, delete, and categorize transactions**, with automatic calculation of total income, expenses, and remaining balance.
- Implemented **data persistence** so users can retain their financial records using **Local-Storage Management System**.
- Focused on responsive design and user-friendly UI/UX for both desktop and mobile devices.

Password Generator [*🔗*](#), (HTML, CSS, Javascript, React JS & Tailwind CSS.)

- Implemented customizable password generation based on **length, uppercase/lowercase letters, numbers, and special characters**.
- Added functionality to **generate, copy, and regenerate passwords** with a single click.
- Implemented real-time validation to ensure passwords meet the selected requirements.
- Designed a clean and responsive **user interface** for a simple and user-friendly experience.
- Different Section to show **last 5 Passwords** according to their generation time.

Accomplishments & Certifications

- | | | |
|--|--|--|
| • HTML, CSS & Javascript Course Completion Certificate. <i>🔗</i> | • Finalist @ HackJMI Hackathon Certificate - Feb, 2023. <i>🔗</i> | • Japanese Language Proficiency Test - JLPT N3 Certified. <i>🔗</i> |
|--|--|--|

Languages

- | | | |
|----------------------------|------------------------|-----------------------------|
| • English - Business Level | • Hindi - Native Level | • Japanese - Business Level |
